

I woke up when I received a call from my mother. I lifted the call and there was some noise going on I asked my mother what's that noise. she told me she was in the Kadapa staying at his sister's house. I spoke to everyone in their family and showed them my room. Later, I woke up, read the newspaper, read the book, and made vegetable rice. at around 2 pm, I ate along with Aravind and started watching tutorials on DevOps. I was a bit sleepy and took a big nap. after I woke up at 7 pm, I had a bath and started studying the swift language. I ordered a table and chair from amazon. During the entire evening, I spoke to Aravind and Lokesh regarding the life settlement in Canada. I watched some videos on DevOps in the evening.
