

I am not remembering so much information which I have done today. I woke up and came to my house and I realized when I am going to the bathroom that my father is bathing. I waited for some time being spent the time on my mobile while my father was bathing. I did my daily chores and started walking. While I was walking, I got a call from Mahesh enquiring about the visa process. I spoke to him for a few minutes and after that, I continued walking for 30 minutes. My brother and my father got ready and they both went to the exam hall. I ate my breakfast and read the BBC news. I was kind of dizzy when I started reading its end with us book.so, I asked my mother to prepare tea and I drank the tea while reading the book. the book was interesting and I completed the book. In the afternoon, before my father and my brother came to the house from the exam hall, Prameela got to my house and waited for my father because she brought a marriage proposal for her daughter. My brother came and I asked about the exam and he said he will pass and wrote the exam for 70 marks. I did enquire about the invigilation and how the teachers are caring for children. Prameela spoke to my father about the marriage proposal and my papa made a few calls and said the groom was okay to give your daughter. I ate my lunch and did some terrible thing in the afternoon which I am not going to discuss. In the evening, after coming out of the bathroom after having a bath, my mother was standing there and told me there were guests in my house and got me the clothes. I picked my spinach leaves and washed those beautiful leaves. I sat in front of my laptop to study related to the English language and I lost interest. So, right now, I am on a blank stage with no interest in my mind and don't know what to do. Before I

go, I have to tell you something which I received the information and it was about my college. My institute released the credits for the subject and the process of how they teach accordingly.
