

I woke up and did browse social media and straight away went to read the atomic habits book. During this time, I heated the water for the bath and went to the bath after the water was heated. Once I had a bath, I ate my breakfast and started learning SQL. In the afternoon, after my lunch, I spent some time watching videos of SQL and studying the tutorials of SQL. at half-past five, I attended the class and the professor told the class about the exercise which we have to do for today as well as Sunday's assignment. He also mentioned it was a group project and he uploaded the blueprint for Tuesday's midterm exam. My batch mates did a stunt and we had to rework it because he needs a change about the database which we submitted. In the meantime, I worked on Sunday's assignment and prepared a few things. Right now, I am writing this diary. Once I complete this, I will go and brush my teeth and will read the newspaper.
