

From the morning onwards, I did work on my project. It took me a while to complete the project. We ended the project in our group in the afternoon. After that, donia and I had a call regarding the part 3 question from the project. We were the first to present the demo in the class because of Premal's interaction with our professor. Donia went ahead without me and the professor didn't see the message of me while she was going. At last, in the end, he gave the access to me and I didn't do much in the contribution to the demo because of the professor and donia. So, right now, I am preparing my document to submit and once I submit it, I will go and have my bath after the class. Then, I will have my dinner.
