

I knew that I need to study the swift language today because we had the final exam. I ate my breakfast after my daily chores and studied in the morning and in the afternoon. I understood a few concepts and didn't understand a few concepts. In the afternoon, my mother made chicken biriyani for our lunch. In the evening, I attended the class and got the question paper for the exam. I did the first two parts and it was easy for me to do those questions. The last part was pretty difficult for a beginner like me and I got the answer at the end from our group mate Priya and I edited the doc to submit the test. Meanwhile, I did several things in the exam. Firstly, I got to know about the group Madhav, and finally, I had a video call with Lokesh from our college regarding the answer I sent to him. After my class and exam, I bathed and came home to eat. During this time, my father was drunk, lying in bed, and speaking in a funny way.
