

Most of the day, I spent without power in my house. I was sick yesterday and decided to spend most of the day resting. In the morning, at around 10 am, we lost power and didn't get any power until 3 pm. I tried to work on the project and within a matter of time, we lost power and we got the power again when I was about to enter the class. In the class, he told the protocol topic which I didn't listen to and focused on the project. I worked on some exercises and got the free time to write the diary. After my diary completion and class, I will go and have a bath and eat my dinner.
