

I woke up at 6:30 am and went to college during the break. In the meantime, Madhav explained our project, and the professor said to add more. I went to the class and made a few contacts on my list. I spoke with some people in my class, told them about what I was doing, and got to know about their items. I came home, had my lunch, watched the Kartikeya 2 movie for a while, and had a wonderful nap. After my sleep, I bathed and worked on the project and lab test. I did my lab test and decided to work on the project in class tomorrow. After that, I ate my dinner and am currently writing this diary. Once I am done with this, I will study for a while and go to sleep. I forgot that I spoke to my parents before I went to bathe.
