

I woke up when subbarayudu come to my house to give me the money which his son took from me to purchase the laptop. I did my daily rituals and had a bath. After my breakfast, I spent some time reading the books. I believe after the reading book I created a database and worked with them. In the afternoon, we lost power and I spoke with my family during the time. once we had power, I studied the book reading and learnt some things about SQL. At half-past five, I attended the class and didn't learn anything because my class professor was the worst. He doesn't anything about any subject I believe. I came out and ate my dinner and started writing this diary. Once I complete this, I think I am going to read the atomic habits book.
