

I worked in my part-time upto 1:30 pm. At that time, I briefly described the site to the next guard who came. Then I came home, ordered some food from outside and then slept. At around 9:30 pm, I woke up and spent some time on my laptop. After a while, I bathed and video-called my mom to get to know about the recipe with the tomato. My mom told me everything and I did the process. Right now, I am sitting in my bed and writing this one. once I am done with this, I will watch youtube videos and then watch web series on Netflix or something. If I am not sleepy, then I will study for a bit.
