

I want to write in my diary where I left from yesterday. I watched the big bang theory web series upto half past twelve and I shut down my mobile and decided to sleep.but , I was not getting sleep and was thinking of various things such as visa , debt and so many things. At around 2 pm , up to that point the wind was calm and slowly sending the fresh air to my terrace. Then, it picked up speed and it was blowing very fast and I could hear the sound of the air. Moreover, the steel in the terrace of kakamma house was making the sound and it was horrible at one point. I think it will fall on us because we were next to the steel. Then I came to my house and slept on the sofa. I woke up in the early morning because of the change and I was aware that I didn't get proper sleep. After my chores such as brushing, reading the newspaper and small things which I do every morning, my father had a heated argument with my family regarding the kaapalli village. My village guys , especially reddy's, they decided to go to kaapalli for their procession. But, it was stopped by my village guys about five years back. My father went to my uncle sabapathi and they phoned the reddy people and told them not to go to kaapalli village with the sri rama statue.after my breakfast, I read the discovery of india book. In the afternoon, I spoke to my father and decided to buy the chicken. I studied android app development once I had completed my lunch. In the evening, I did my leg exercises and went to take a bath. At around 10 past 6, I read the java language for one hour and started writing the diary. Once I complete this, I will have my dinner, watch a web series, clean, brush and go to sleep.
