Subject: Statement of Purpose for the Application for Study Visa

Dear sir/madam,

My name is Sunkara Vishnu Vardhan and I dwell in the Kadapa area of Andhra Pradesh state, India. I come from an inspirational family where My father Ravichandra, is a businessman, my mother subhashini, is a homemaker. My parents always told me to study hard and let my success speak rather than words and I genuinely believed those beautiful lines, in order to achieve that I always studied hard and pushed my ability beyond my limits. Right now, I am one big step away from studying for the post-graduate diploma in the prestigious Lambton College, Toronto.

Furthermore, I am here writing this sop to grant me permission to study in the second-largest country in the world, Canada, and serve my country through how much information and astuteness that I will profit from the subjects which I took and learned in your country. I have submitted my letter of offer from Lambton College, Toronto, with the program(Mobile application design and development) commencing from May 2022.

My Education Background

I have done my schooling and intermediate college in the institute of Narayana schools and colleges. I secured a 9.7 CGPA in my class 10th and 962 marks in my class 12th popularly known as intermediate education in India. After completion, I was looking for a course that can improve my intellectual thinking, my interest in software languages, and my curiosity in semiconductor chips. During that time, I have seen tremendous growth in the software and electronic sector. so, I took Electronics and Communication Engineering at Sathyabama institute of science and technology, Chennai and I have done my best in college and aggregated with 7.3 CGPA. To get admission in Canada, I take down the IELTS test. in the exam, I got an overall 7 band.(speaking:7.5, listening:7.5, writing:6.5, reading:6.5)

Work Experience

In the year 2020, in the midst of the covid pandemic, I got an email to apply for the position of jr. full stack developer in the caagnota info company. I wrote their exam in no time and I have cracked the exam. I attended their interviews such as technical, group discussion, and hr round through zoom video call and I received my offer letter to work in the company. Currently, I am working as a Jr. full-stack developer for a

caagnota info company from 15th June 2020. My experience with the company has taught me to think in a way that is always good for the industry, understand others' perspectives, and have realised where my true passion and interest are.

synchronously, I invest my money in the stock market and trade these stocks at India's biggest stock exchanges called National Stock Exchange and Bombay Stock Exchange.

Why I Choose This Program

I took mobile application design and development as my program for two years of study. It develops a wide variety of skills in developing applications. The course contains co-op in the fourth semester, which will help me in work exposure. During these covid times, most of the people were addicted to smartphones using Facebook, Instagram, TikTok, etc. If I have to talk about myself, I am addicted to a few apps such as Twitter, Bbc news, and Gmail because of their friendly interface. According to reports, India is growing at a fast pace in terms of users using different apps. The CEOs of Oyo, red bus, Paytm became billionaires within a short time because of their innovative business app ideas. When I saw these people, I always thought of learning app design. Once I learn app development fully, I will design apps that will be useful for the entire Indians. After studying a lot of research papers and doing intense talks with people who are actually in the software industry, I decided to take a mobile app design and development course.

Why I Choose Canada

when I first thought of studying higher education, I always thought of Canada as my first and foremost choice. Canada has consistently ranked high in terms of education rankings compared to other countries. There are numerous reasons to choose Canada as the country to study higher education. The most prominent features are multi-cultural diversity, quality of life, learning every topic through practical way, Thesis, co-op, and low-cost study. If I have to talk about the city that I selected for my college I have chosen Toronto as my campus because Toronto is destined for world-class education, multicultural neighbourhoods, and affordable living expenses.

I would like to add one more point why I selected Canada in terms of politics. on May 18th, 2016, prime minister Justin Trudeau gave an unequivocal and unconditional apology to Indians in the House of commons because of the komagata maru incident that took place on May 23rd, 1914. The Prime minister got outstanding applause from all over the world. Later on, as responsible citizens of India, we formally accepted the apology.

Considering all this information, I am in the opine of Canada is the best place to not only study but also in several aspects.

Future Goals

After completion of my post-graduate diploma, I will come back to my nation to serve the knowledge that I gained through studying by working in innovative software companies. app design is the one field that is growing at a rapid rate in my country. Since my childhood, I always wanted to contribute something to my nation which will help my nation transfer from a developing nation to a developed nation, and I believe education overseas is the best way to revolutionise myself and fulfil my goal.

Financial Goals

My father is a person who brings the lion's share of income and supports my family in financial conditions. I hereby declare that my father is supporting me financially throughout my study in Canada. I have paid \$10000 and \$17360 towards the GIC program and first-year tuition fees, respectively. Moreover, I took a mobile application design and development course with the co-op option in my fourth semester, thereby I have to pay only \$9010 as a remaining tuition fee for my second year.

Closing Paragraph

First of all, I would like to say thanks to the dean of Lambton college for permitting me to study in one of the best colleges in Ontario. secondly, I am a responsible citizen and a hard-working person who always believes in the constitution and democracy of a nation. Finally, I will abide by all the laws and rules that are in the constitution of Canada.

I am heartfully waiting for the approval of my study visa.

Yours sincerely,
Sunkara vishnu vardhan.
